

Welcome to Winchester Pediatric Clinic, a group of nine board-certified pediatricians dedicated to the welfare of your children. We look forward to helping you in any way that we can, and continue to offer appointments for both routine well-child care as well as sick visits. In addition, we see patients at the Winchester Medical Center in the newborn nursery, on the pediatric floor, and, when indicated, in the emergency room. We hope for a long and healthy relationship with you and your family.

An important part of what we offer at Winchester Pediatric Clinic is preventive medical care. Central to the preventive pediatric care offered is a schedule of childhood immunizations. These immunizations have been proven safe and effective for thousands if not millions of individuals and we believe strongly that protection against these sometimes lethal diseases is essential. In addition, non-immunized patients in the office pose a significant risk to our patients, especially the most vulnerable: newborns, immuno-suppressed, and medically complicated. The attached series of scheduled immunizations recommended by the American Academy of Pediatrics is that which we adhere to here at Winchester Pediatric Clinic.

We would be glad to address any questions or concerns that you have about the vaccine schedule. If there are concerns that lead parents significantly to alter the schedule or to forgo the immunizations, we would be glad to assist you in finding other pediatricians in the area for your medical home.
